

Medical Inventory Management System

Team ID	NM2025TMID05596
Project Name	Medical Inventory Management System
Team Members	Palanivelu S (Reg.No:912422104028) Muralikrishnan R (Reg.No:912422104025) Mohammed Aashik Sh(Reg.No: 912422104024) Mohamed Azrath Rahuman S (Reg.No:912422104022)

PERFORMANCE TESTING PHASE

1. Objective

Ensure the Medical Inventory Management System performs efficiently under various load conditions, maintaining high response rates and data integrity.

2. Testing Strategy

- Load Testing:** Simulate 1000+ concurrent users accessing stock data.
- Stress Testing:** Evaluate system behavior during massive data input.
- Scalability Testing:** Assess horizontal scaling on cloud deployment.
- Security Testing:** Check role-based access and data encryption.

3. Metrics & Benchmarks

Parameter	Target	Result
Average Response Time	< 2 seconds	✓ Achieved
Data Accuracy	100%	✓ Achieved
CPU Utilization	< 70%	✓ Achieved
Uptime	99.9%	✓ Achieved

4. Tools Used

- Apache JMeter
- Postman (API validation)
- Selenium (UI performance)
- MongoDB Compass (query efficiency)

5. Result Summary

The system maintained high stability during simulated hospital peak hours, showing no data loss and consistent response rates.
